

Neurodivergent. Empowered

Neuro-affirming support, in person and online

FAQ: What are resource-integrated supports?

When the resources and environment are part of the support.

1. INTEREST IS THE ACCESS POINT

For our participants, the interest is not an entertainment add-on. It is the access point for capacity-building.

The resources and environment help support engagement, communication, emotional safety, flexibility, problem-solving, peer connection, and meaningful participation.

Interest-based support with purpose.

2. WHAT MAY BE INCLUDED

- ✓ structured resources
- ✓ prepared materials
- ✓ sensory supports
- ✓ creative materials
- ✓ activity-specific setup
- ✓ planning to make the support accessible

Resources built into the experience.

3. WHAT IS INCLUDED IN SESSION COST

Standard session resources are built into the capped hourly rate.

- | | |
|-----------------------|---------------------------|
| facilitation | capacity-building support |
| communication support | peer interaction |
| regulation support | sensory adaptations |

If there is ever a significant external cost outside ordinary session resources, it would be discussed and agreed separately.

Transparent and inclusive.
